# WHO WE ARE

# WE MAKE EXTERNAL SUN SHADING FOR MORE THAN 40 COUNTRIES OF THE WORLD

We have been a leading Czech manufacturer of external blinds since 1990. Our manufacturing lines make more than 100,000 external blinds and textile screens every year which we supply to tens of thousands of customers all around the world for family and apartment houses, office buildings, winter gardens, pergolas and public buildings.

France, Norway, Israel, Australia, Japan or South Africa – our blinds perfectly manage the Scandinavian climate, scorching heat or extremely salty air in seaside regions.

# THE JOURNEY OF OUR BLINDS AND SCREENS STARTS IN KRALICE NA HANÉ

Only few know the small town on the outskirts of Prostějov with 1,400 inhabitants. But we are making it a Czech Mekka of external blinds.

We built two modern production halls, warehouses, powder coating shop, offices, showroom and relax zones on 14,000 m<sup>2</sup> here. And our plans are far from over.

**34**  
years of experience

**180**  
satisfied employees

**2,500**  
blinds a week

**350,000**  
square metres of blinds a year

# IT ALL STARTED MORE THAN 30 YEARS AGO

## 1990

Shortly after the velvet revolution, Jiří Nesvadbík and Ladislav Vrána found the first internal blinds and awning manufacturing plant.

## 1999

We install a customised rolling line made by ZEBR. This makes our production one of the most developed ones in Europe.

## 1996

We expand the product range with external blinds the demand for which is huge. Over time, we specialise solely in these.

## 2002

Thanks to fast expansion, we officially found ŽALUZIE NEVA s. r. o.

## 2012

The company moves to a new plant with a production area of 6,500 m<sup>2</sup>.

## 2017

The manufacturing premises are no longer sufficient, therefore, we build another hall with its own warehouses and shipping area.

## 2023

We build a new office building including showroom and training centre.

## 2020

We expand our product range with external screens. We make 2,000 blinds and roller shutters a week for customers from more than 40 countries of the world.

## 2014

We open in-house powder coating shop for component coating. Our coating operations are even enquired by competitive blinds manufacturers.

# THERE ARE 180 OF US IN NEVA, ALTHOUGH THERE IS A FAMILY SPIRIT PREVAILING

NEVA is not only about products, but also about family values and personal approach. The company was established by Ladislav Vrána and Jiří Nesvadbík who have been gradually handing over the company management to their children.

Family values are not mere routine words to us, but reality we live on a day-to-day basis. It is reflected in the

company internal relationships or in our approach to cooperation with business partners. We take pride in personal and fair approach – what we say and agree to applies without any exception.

Our history and values create solid foundation for future innovations and company development.

**“I STRONGLY BELIEVE THAT THE VALUES WE STARTED OUR BUSINESS UPON ARE STILL EVIDENT IN THE COMPANY, HELPING US SET ITS DIRECTION. WHETHER WE TALK ABOUT OUR APPROACH TO EMPLOYEES, PARTNERS OR MANUFACTURING OF PRODUCTS AS SUCH.”**

— Jiří Nesvadbík, the company founder

**“NEVA HAS BEEN OPERATING FOR MORE THAN 30 YEARS AND IT IS CLEAR THAT WE CANNOT KEEP DOING THINGS LIKE WE DID AT THE VERY BEGINNING. THIS WOULD NOT BE REASONABLE. HOWEVER, IT IS IMPORTANT TO US THAT OUR COMPANY REPRESENTS THINGS WE DO CARE ABOUT. QUALITY, FAIRNESS AND PROFESSIONAL APPROACH.”**

— Ladislav Vrána, the company founder

# SOCIAL RESPONSIBILITY IS ENCODED IN OUR DNA

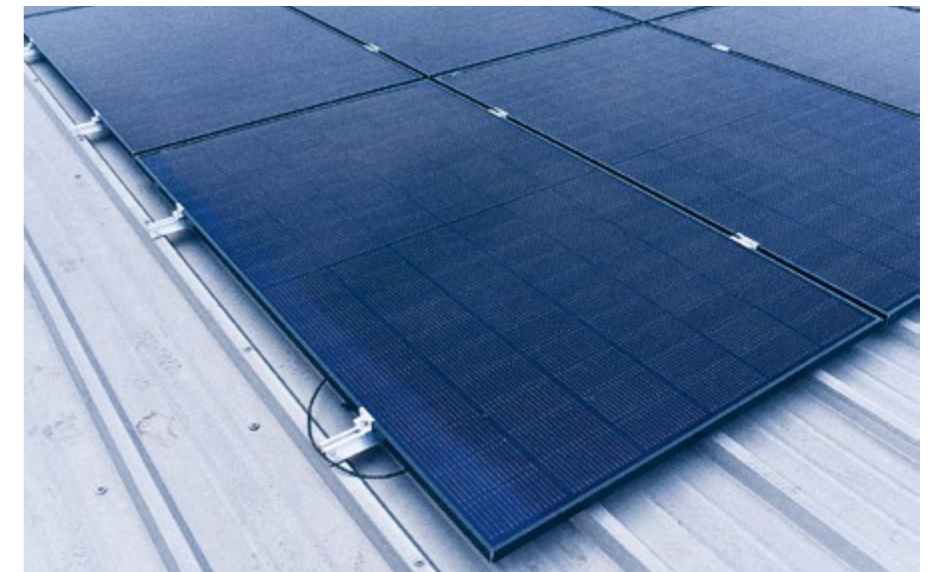

We donate more than EUR 20,000 to charity activities, we organise charity trips and financially support associations in our region – for example, the volunteer fire company or the kindergarten.

We use the residual screen fabric to make stylish shopping bags and tea-cloths, pack finished goods in custom packaging

in order to produce minimum quantity of waste, or use reusable boxes for shipment.

We also pursue reducing energy consumption. We have installed photovoltaic panels on the roof which completely cover our power demand on sunny days and we use the after-heat from compressors to heat the hall or pre-heat the coating technology.

# PRODUCTION IS THE BIGGEST PRIDE OF OUR COMPANY

Advanced rolling machinery made by a Czech company ZEBR, high degree of automation and organisation, intelligent purchase order placing system or ever-present proper order and cleanliness. The visitors often say that one could eat from the floor in our manufacturing facility.

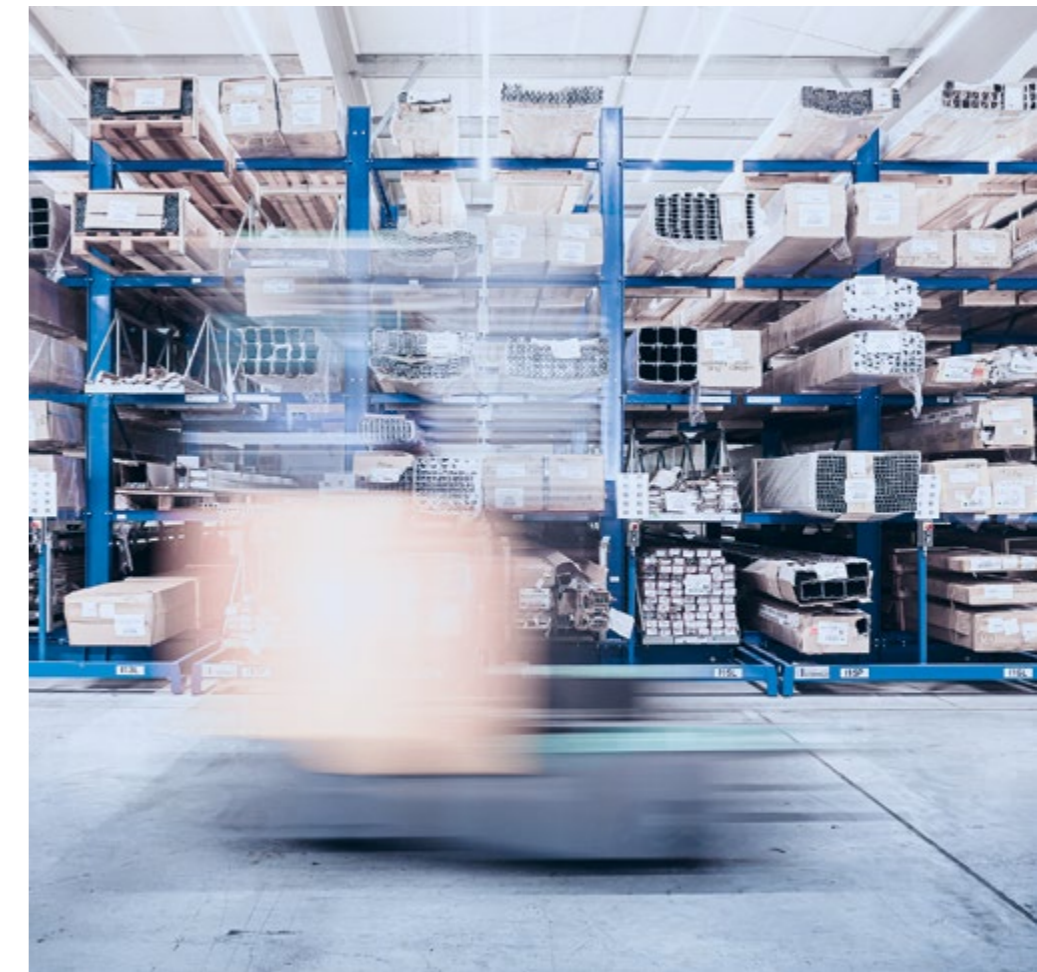

It all starts with diligent selection of suppliers. We purchase slat roll for blinds from Switzerland, fabric for roller shutters from France and Belgium, motors from Germany and France. We make small components ourselves.

**“I HAVE BEEN WORKING WITH NEVA FOR MORE THAN 16 YEARS AND ALTHOUGH THE COMPANY KEEPS DEVELOPING, IT IS OBVIOUS IT IS MOVING IN THE RIGHT DIRECTION ITS FUNDAMENTAL VALUES – FAIRNESS AND CONFIDENCE – REMAIN UNCHANGED. THIS IS ALSO WHY I AM HAPPY THAT I AM A PART OF IT.”**

— Lukáš Opavský, production foreman

Automated rolling mills or bending presses with a laser angle check create premium external blinds and screens which we always complete within 10 business days as of placing the purchase order, properly identifying, packing and then safely delivering them to the site or to our assembly partner's warehouse.

# WHEN WE OPENED THE COATING SHOP IN 2014, IT ALSO ATTRACTED OUR COMPETITORS

The times when we outsourced coating of our components from external coating plants are long gone. The outcome was not satisfactory, deliveries were late.

Therefore, we built our own powder coating shop in 2014. It was so unique at that time that our direct competitors enquired coating operations from us.

Thanks to our own coating shop, we have an absolute control over the surface quality and the component completion timing.

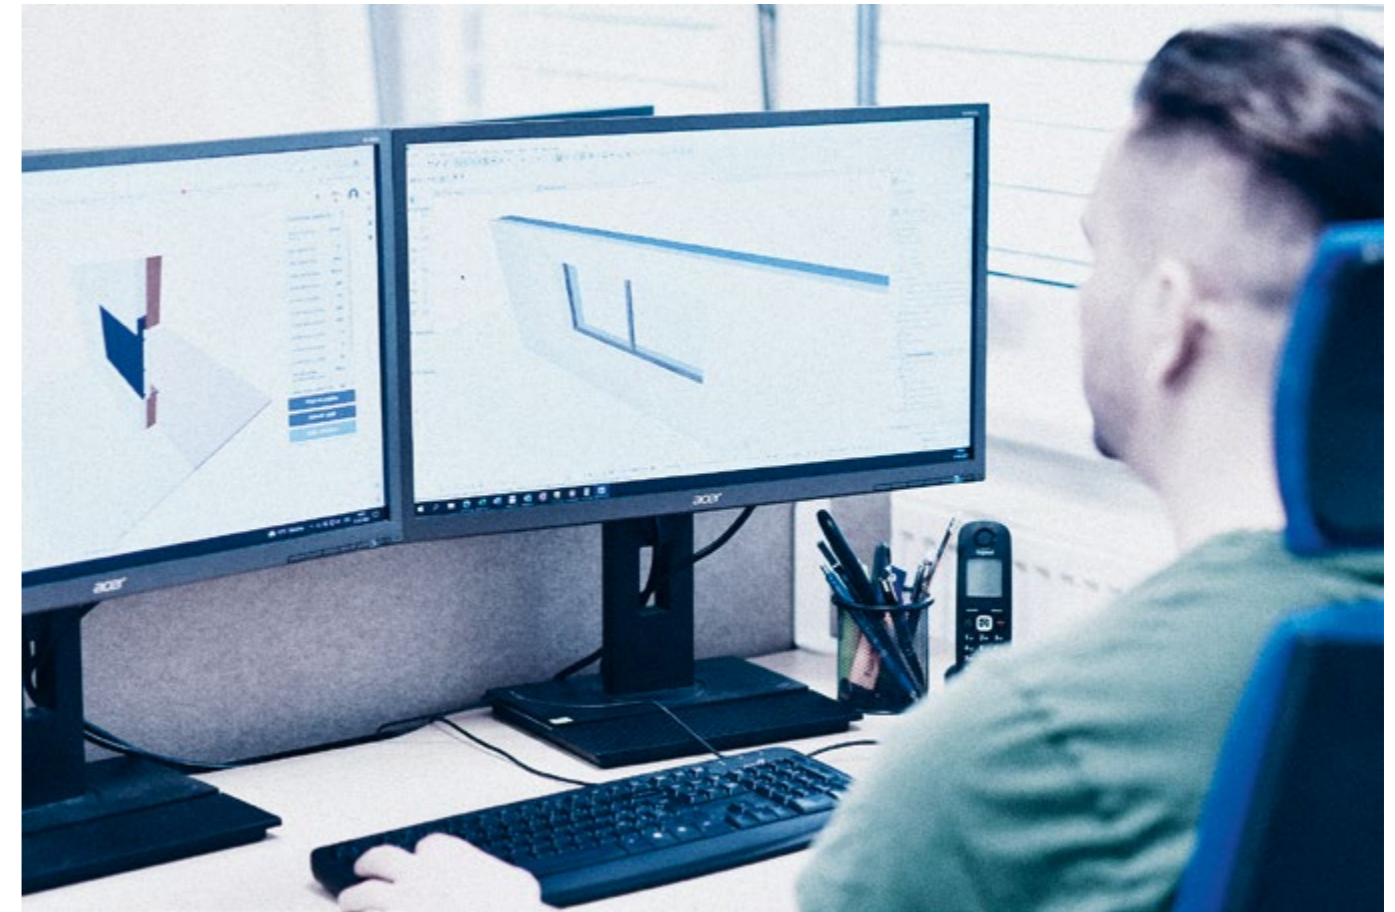

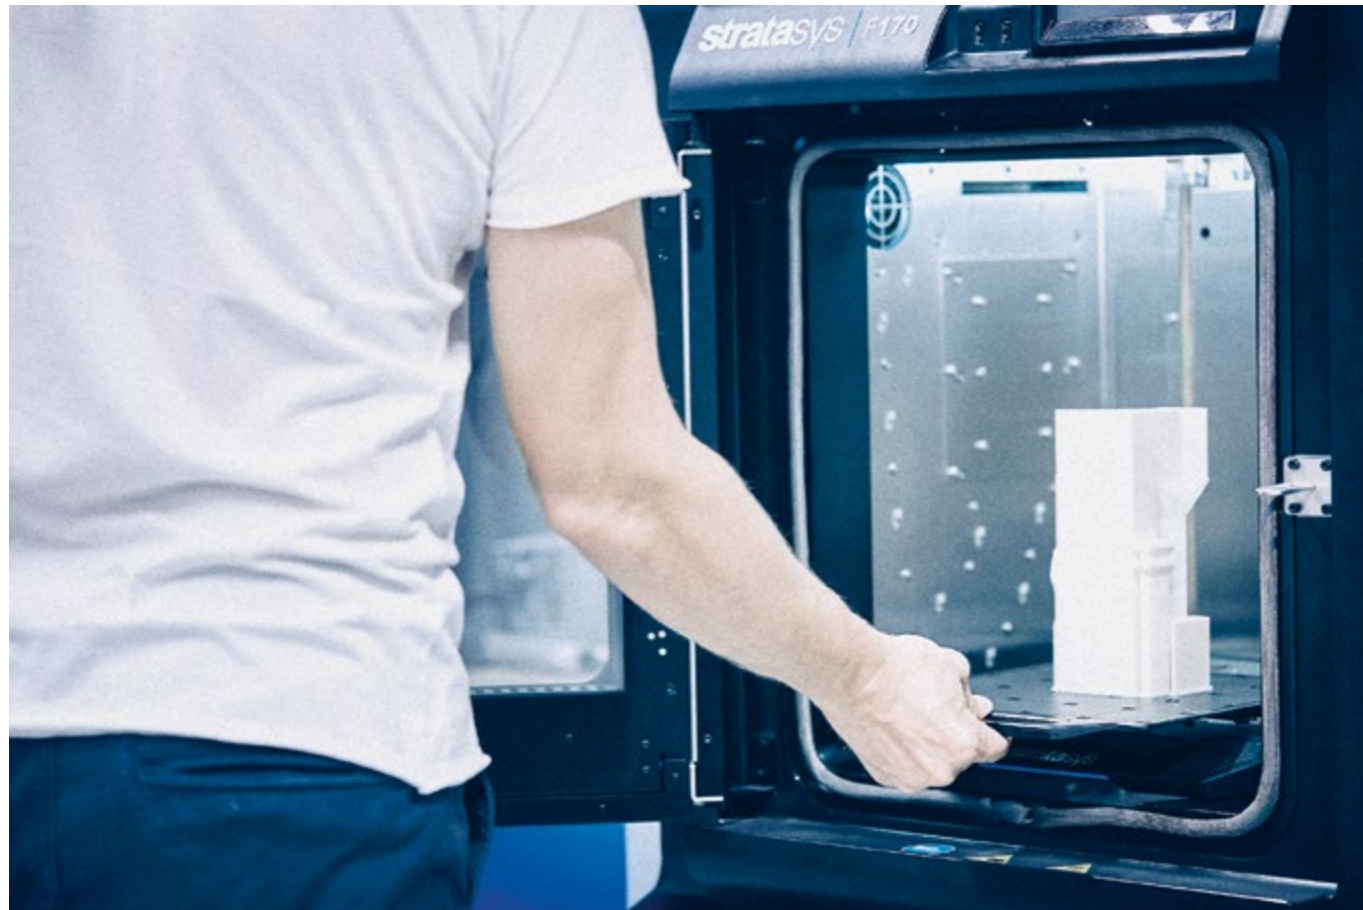

**“THANKS TO OUR IN-HOUSE COATING SHOP, WE HAVE A PERFECT CONTROL OVER THE RAW MATERIAL, WHICH ENABLES US TO ENSURE 100% COATING QUALITY TO DELIVER TO OUR CUSTOMER.”**

— Michal Horák,  
head of powder coating shop

# DO YOU THINK ALL BLINDS AND SCREENS ARE IDENTICAL? MAKE NO MISTAKE

Maybe from a distance, but detailed exploration will reveal the differences. Lift tape width and quality, slat hook material, welds on screens. These are the details which define the product quality and NEVA is highly particular about those.

Our development and technical department keeps finding ways of improving the blinds and screens. It develops and prints prototypes on a 3D printer, testing all components and products in the field on a periodical basis.

For instance, in recent years we have developed our own ISO-KASTL concealed case, ISO-PANEL side plates made of recycled material or stylish concealed screens free of visible welds and bolts which are so sophisticated that it is very easy to repair or replace both motor and fabric.

# THE BEST WAY OF CHECKING THE QUALITY OF OUR BLINDS IS TO SEE THEM LIVE

We present our large-format external blinds and screens, catalogues of all slat types and screen fabrics and any minor accessories in our showroom in Kralice na Hané.

In order for the partners to properly see the quality of our products, we have established a training centre that has been designed by Vrtiška & Žák architectural studio.

And if you wish to see our shielding equipment live, we can go to see the training centre and showroom from the outside. We have shielded the entire building with our products.

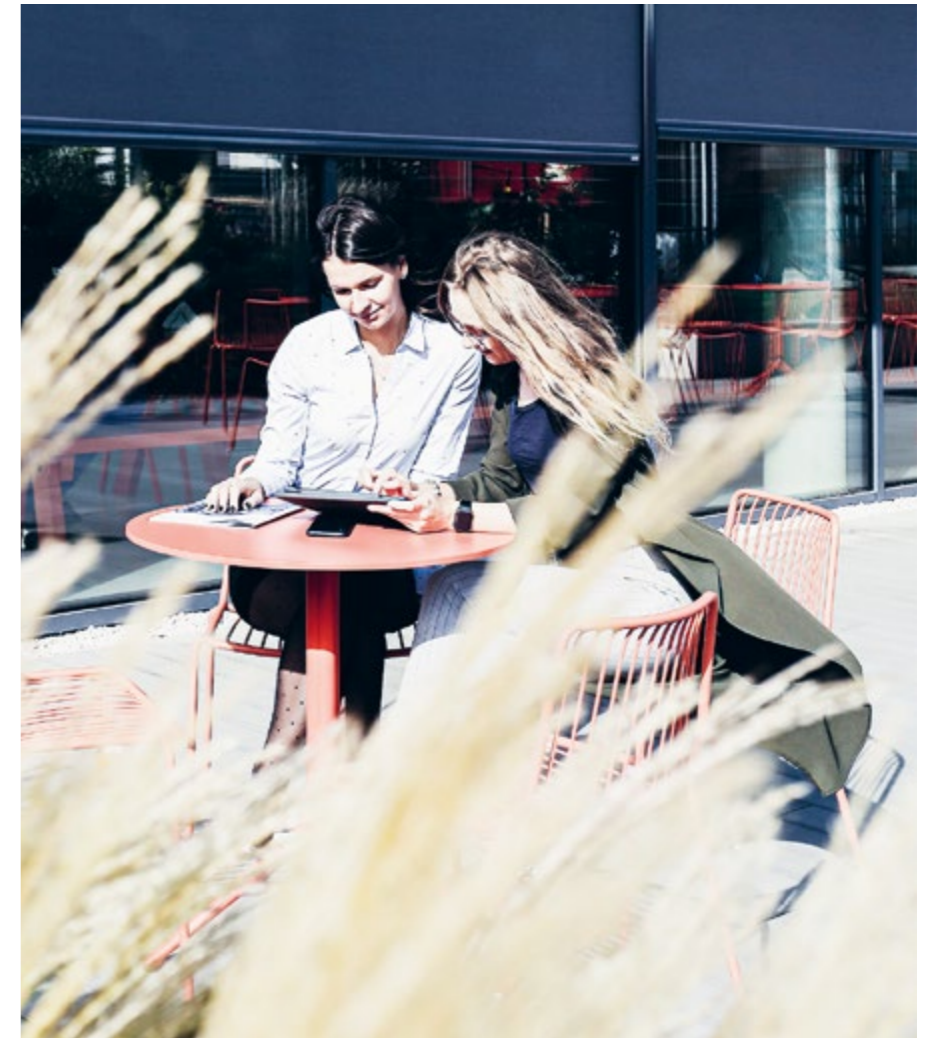

# WE ALSO ADD TOP-CLASS SERVICING TO THE TOP-QUALITY PRODUCT

We understand the technical aspects of external shielding and we will be happy to discuss anything in details with you. We have in-house design engineering department that can also design and implement non-standard solutions. We also work with architects who will discuss our proposals or ideas with you in a professional way.

Once you order the products, all standard blinds and screens are made within 10 business days. The warranty for shielding is 2+2 years and 5 years for motors.

We will also be happy to train your assemblers or dealers. The telephone technical support will always be available to you. We will always deal with any problem or demand.

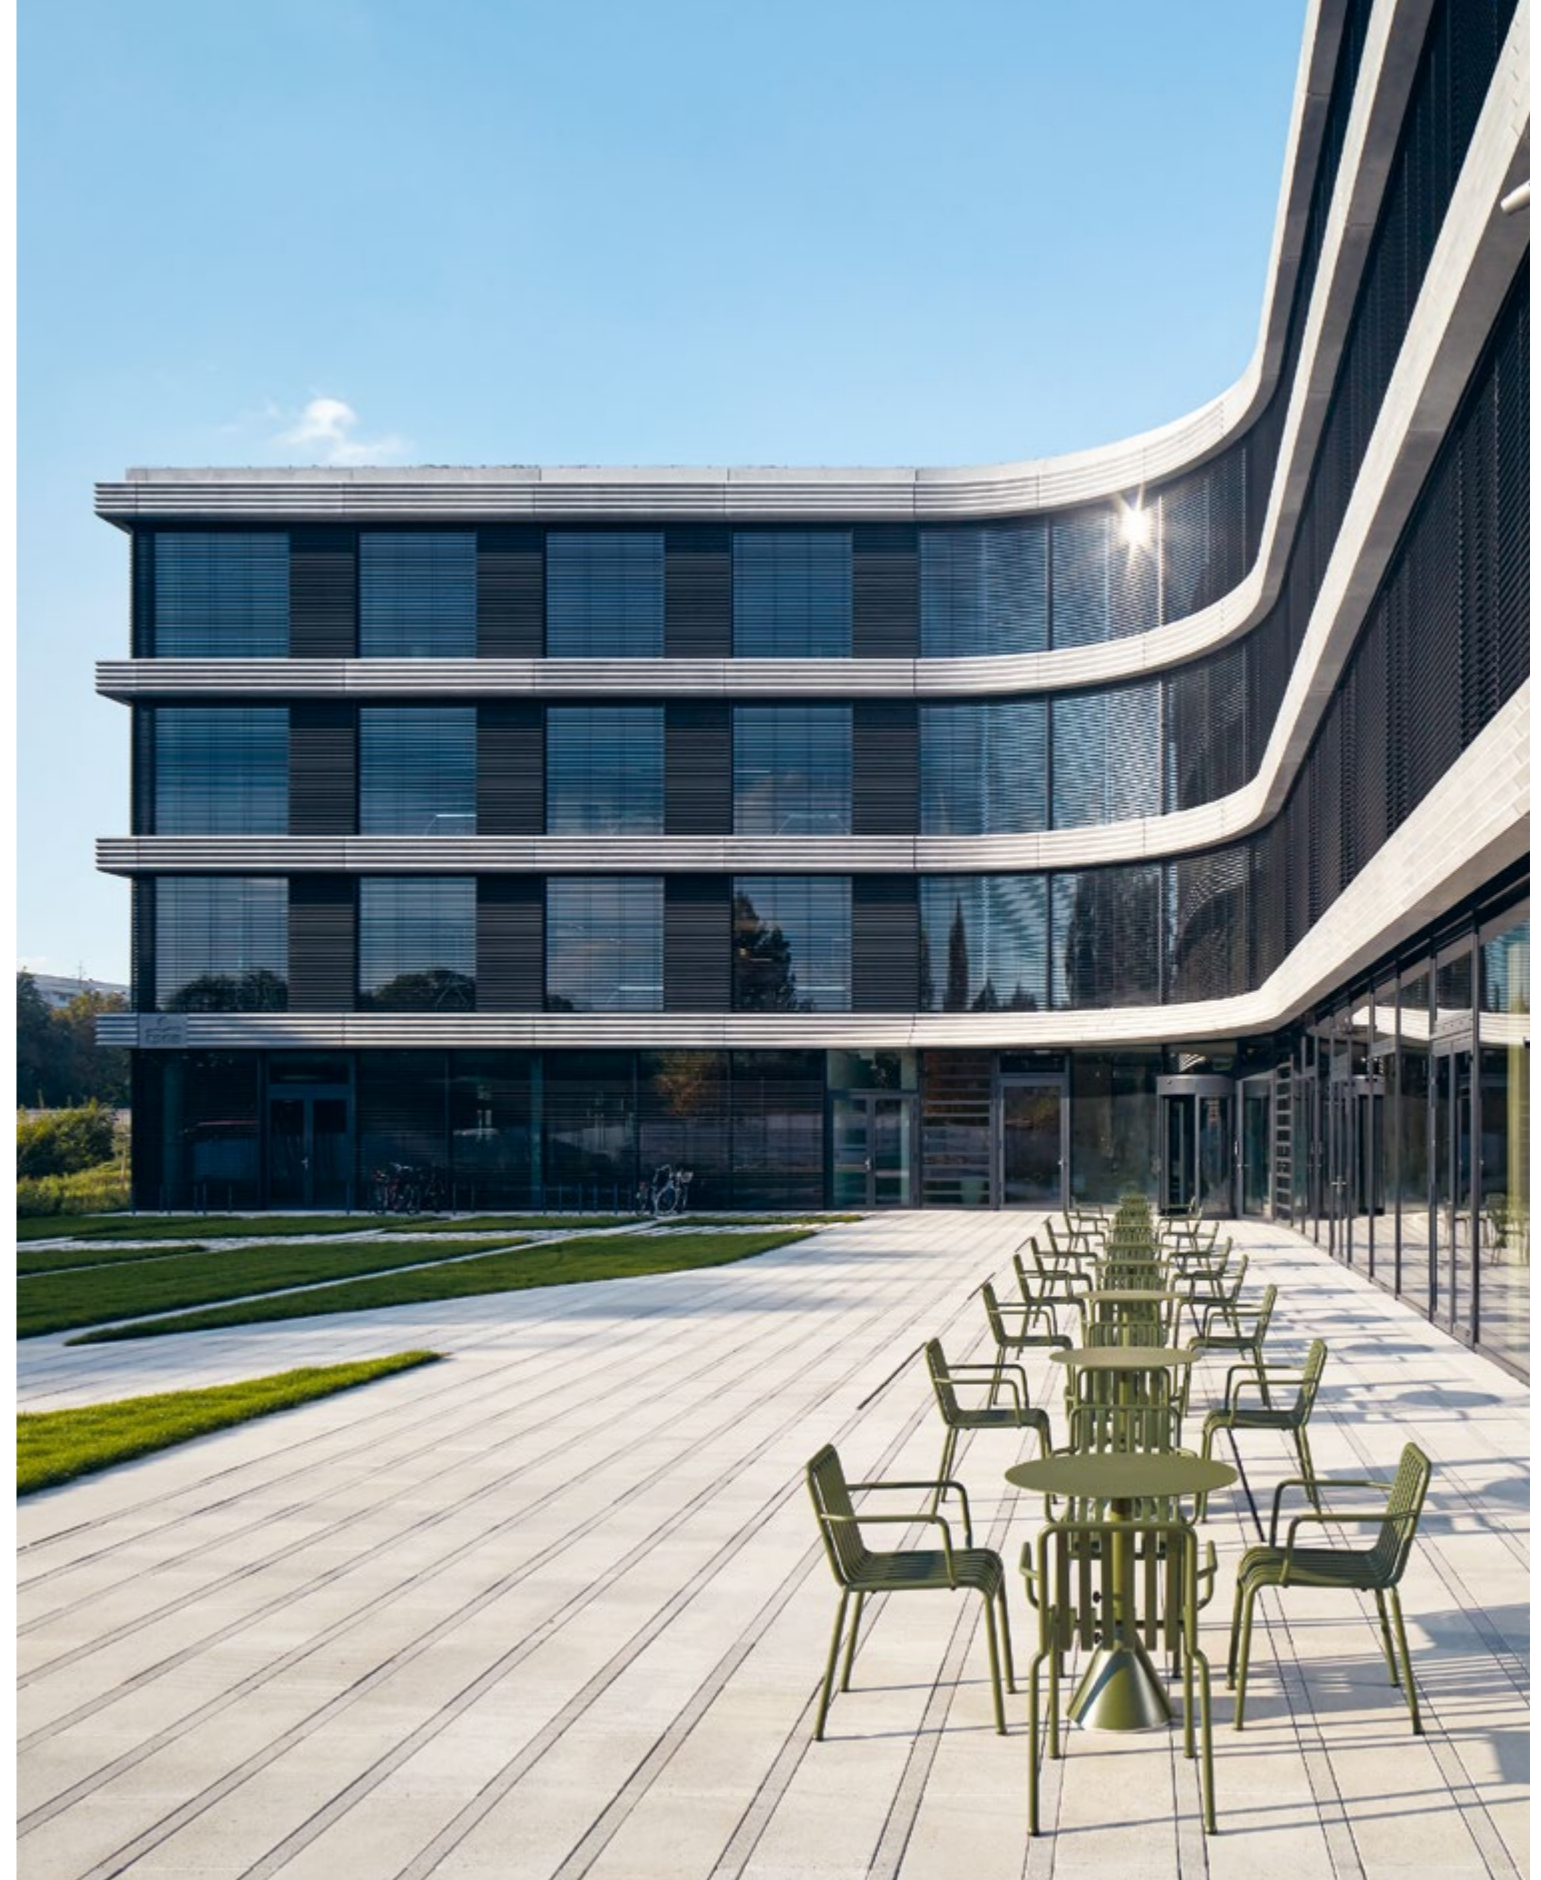

# WHAT WE DO

# OUR BLINDS SHIELD FAMILY HOUSES OR OFFICE BUILDINGS ALL AROUND THE WORLD

We started to deliver the first external blinds back in 1996.

We have made hundreds of thousands of them for almost 30 years around the globe, making their design and function perfect.

# EXTERNAL BLINDS

NEVA external blinds create pleasant climate inside buildings, enabling sensitive control of the amount of light. They are highly resistant to wind and rain, they last for decades.

 Slats in 22 colours, accessories in any RAL colour

The material for the external blinds comes from Switzerland, the electronics come from France and Germany, we coat the components in our in-house powder coating shop. We properly identify and prepare the blinds in the manufacturing

process, making the installation thereof as easy as possible. We will make any standard blinds within 10 business days as from manufacturing order, providing warranty for 2+2 years for blinds and 5 years for motors.

External blinds

## S

- + perfect darkening
- + high wind resistance
- + appearance of a roller shutter

External blinds

## C

- + tilting of slats to both sides
- + precision light control
- + ideal for office buildings

External blinds

## Z

- + most popular blinds in the market
- + perfect darkening
- + high wind resistance

External blinds

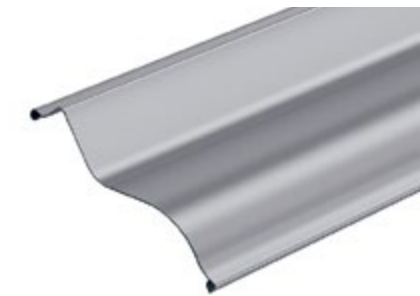

## F

- + tilting of slats to both sides
- + very low packet
- + ideal for additional assembly

# S90

## ELEGANT AND DURABLE SHIELDING

Slats of the S90 blinds precisely fit into each other, thus providing perfect shielding. They look like roller shutters which you can combine them with in an elegant way. Fixed aluminium slats guarantee high wind resistance.

### CLOSE-FITTING SLATS

The slats of the S90 blinds precisely fit into each other, such that when closed they form an elegant unbroken layer which perfectly shields and protects your privacy.

### VERY SOLID SLATS

Aluminium slats of the S90 blinds are extremely strong and durable. Thanks to this, they can easily cope with strong winds and are less susceptible to damage.

### FINE APPEARANCE

S-shaped slats when down give a fine and decent impression. Therefore, you can combine them, for instance, with roller shutters in an elegant way.

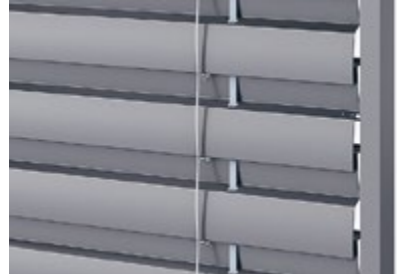

# Z90

## THE BEST-SELLING BLINDS FOR ALL TYPES OF BUILDINGS

The best-selling external blinds in the market which provide perfect shading and are durable. Compared to the Z70, they have wider slats that are perfect especially for shading French doors or big glass walls.

### VERY SOLID SLATS

Aluminium slats of the Z90 blinds are extremely strong and durable. Thanks to this, they are resistant to strong winds and are less susceptible to damage.

### A HIT AMONG BLINDS

Z90 is the best-seller in the market. Their quality is proven by many satisfied customers world-wide.

### UNIVERSAL SHADING

Thanks to their appearance and properties, Z90 blinds work perfectly for both modern and traditional buildings. They can be used in city centres or in mountains.

# Z70

## ELEGANT AND DURABLE SHADING FOR RATHER NARROW WINDOWS

Pleasant and silent blinds which is the most useful in rooms with small windows, or on houses with thin façade layer. Compared to Z90, they have more slats which are narrower and thus more decent.

### CLOSE-FITTING SLATS

The slats of the Z70 blinds precisely fit into each other, such that when closed they form an elegant unbroken layer which perfectly shields and protects your privacy.

### ELEGANT APPEARANCE

Thanks to the higher number of narrower slats, the Z70 blinds have a fine and elegant appearance even on small windows.

### FLEXIBLE SOLUTION

The Z70 blinds are an ideal solution for small windows. Thanks to the narrower slats, they are perfect also for places with a thinner façade layer where the Z90 cannot fit.

## FAMILY HOUSE WITH WOODEN LINING

A family house in Jevany near Prague that utilises a distinct contract of current elements with traditional natural materials.

The current elements are dominated by Z90 blinds in anthracite colours. Thanks to solid slats and guiding rails, the blinds are perfectly resistant to wind or rain.

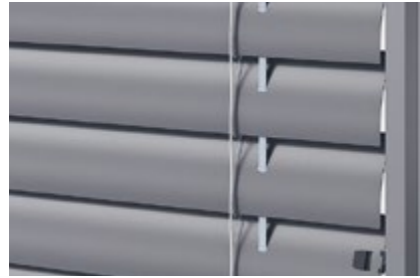

# F80

## UNIVERSAL BLINDS FOR THE SHADING OF ADMINISTRATIVE BUILDINGS

Thanks to their elegant appearance and thin slats not reducing the window daylight width much, F80 are very popular external blinds especially for additional assembly. You can tilt the slats in both directions.

### YOU CAN TILT THE BLINDS IN BOTH DIRECTIONS

Slat tilting in both directions enables highly sensitive light and shade control in the room as you need.

### THEY SAVE SPACE

Very flat slats when up form a very low packet that does not reduce the window daylight width. Ideal for additional installation.

### VARIABLE SOLUTION

F80 blinds are perfect for family and apartment houses, as well as for administrative buildings or offices.

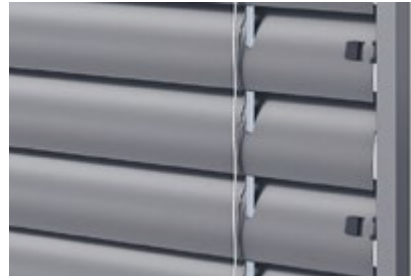

# C80

## QUIET AND DESIGNER SHADING FOR OFFICES

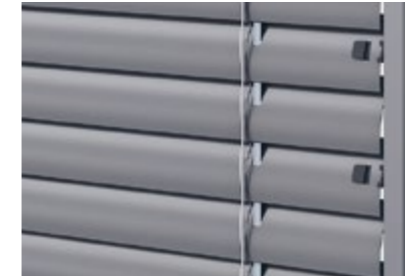

The C-shaped slats can be tilted in both directions, thus precisely controlling the shielding and letting only the required amount of light in. Unlike the C65, the C80 have more robust slats and can thus cover a bigger surface.

# C65

## FINE AND ELEGANT BLINDS FOR RATHER SMALL WINDOWS

The C65 blinds are ideal for everyone who wants to have perfect control over shading. The slats can be tilted in both directions, and the C65 slats are narrower compared to C80. Therefore, they are perfect for small or narrow windows.

### YOU CAN TILT THE BLINDS IN BOTH DIRECTIONS

Slat tilting in both directions enables highly sensitive light and shade control in the room as currently needed.

### VARIABLE SOLUTION

The C80 blinds constitute popular external shading not only for households, but also for administrative buildings and offices.

### DECENT DESIGN

Slightly round C-shaped slats give a very decent and elegant impression, which is appreciated even by demanding designers or architects.

### ELEGANT APPEARANCE

Thanks to the larger number of narrower slats, the C65 blinds have a fine and elegant appearance even on small windows.

### FLEXIBLE SOLUTION

The C65 blinds are an ideal solution for small windows. Thanks to the narrower slats, they are perfect also for places with a thinner façade layer where the C80 cannot fit.

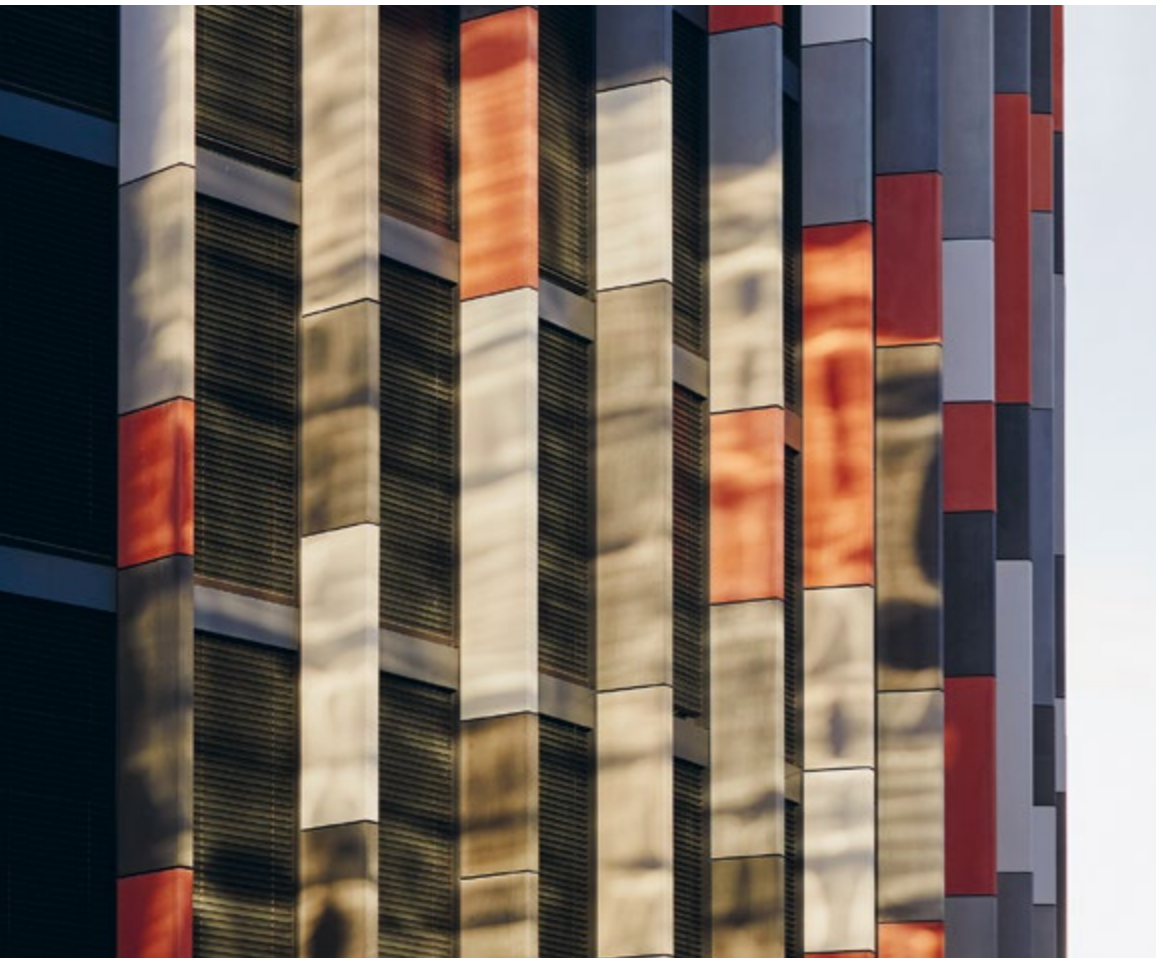

### SUFFICIENT LIGHT AND PRIVACY

By tilting the slats to both sides, you will let an ideal amount of light into the room, while protecting your privacy.

## MAIN POINT KARLÍN

The Vienna Insurance Group headquarters were designed by DAM architekti. They emphasised mainly minimising of energy demand and environmental impact.

Therefore, the building is shielded by 1,570 pcs of our C80 blinds which provide both thermal and light comfort for all office and social premises.

# SELF-BEARING SYSTEMS

The self-bearing and façade systems significantly facilitate installation of blinds on site. We make them ready in the plant to make the assembly thereof a question of a moment.

# BLINDS ACCESSORIES

STF system is supplied with insect screens, we have developed a case for concealed blinds and offer PET granulate panels for the side section installation.

## STF

STF is a robust self-supporting system that enables assembly in any stage of construction. In addition, you can fit it with an integrated rolling insect screen.

## STL

STL is a delicate system that requires the construction preparation for assembly. The installation to follow is, however, very fast.

## FAÇADE SYSTEM

The façade system is easy to assemble as a whole to a finished façade. Just anchor the external blind using load-bearing guiding rail holders.

## ISO-KASTL

Purenit concealed case is made to measure for any blind. It is light-weight, solid with a constant volume even at low temperatures, and therefore, perfect for all conditions.

## ISO-PANEL

A panel facilitating installation of side guiding rails in the window reveal. ISO-PANEL is made from PET granulate, it is light-weight, resistant to water and moisture and is easy to recycle.

## INSECT SCREENS

We can make custom rolling insect screens as an integral part of the STF self-supporting system.

# TEXTILE SCREENS WHICH PERFECTLY SHIELD HOUSES OR PERGOLAS

The screens were included in the product range in 2020. This followed a long development and diligent selection of material suppliers so that the textile screens meet our strict requirements for quality.

We currently offer two types of conventional and two types of stylish concealed screens.

# TEXTILE SCREENS

NEVA textile screens create pleasant climate in the house, privacy and cosy atmosphere, though you can see out, thus staying in contact with your garden or city neighbourhood.

 Fabrics in 21 colours,  
 accessories in any  
 RAL colour

We purchase the screen materials from top-class producers based in France and Belgium, motors mainly from France. We offer three fabrics and huge number of colours, whereas the textile screen can have a different colour on each side.

All make all standard screens within 10 business days and offer 2+2 years of warranty.

Zipscreen

## ZIP100

- + modern, economical and durable
- + delicate bottom profile
- + top box width of 100 mm
- + square and half-round variant

Zipscreen

## ZIP135

- + modern, quiet and durable
- + max. width of 6 m
- + top box width of 135 mm
- + square and half-round variant

Zipscreen

## ZIP110

- + stylish, quiet and resistant
- + mounting under façade
- + ideal for pergolas
- + top box width of 110 mm

Zipscreen

## ZIP150

- + stylish, quiet and resistant
- + mounting under façade
- + max. width of 6 m
- + top box width of 150 mm

# ZIP100

ELEGANT TEXTILE SCREEN THAT  
WILL PERFECTLY SHIELD YOUR HOUSE  
AND PERGOLA

Elegant textile screen that will perfectly shield your house and pergola. We produce it with the top box in a square or half-round variant and with two types of bottom profiles and guiding rails. One of them is a snap-on rail without screws, so it looks better and makes servicing and assembly easier.

## IT HAS A LUXURIOUS LOOK

The ZIP100 textile screen is elegant and looks great on pergolas, family houses and office buildings. It will be appreciated by architects, designers, as well as demanding investors.

## IT DARKENS AS REQUIRED

We make the textile screen from any of 21 fabrics – from translucent up to strongly darkening blackout creating a perfect dark in the room.

## WITH ELEGANT BOTTOM PROFILE

ZIP100 roller shutter can have a highly delicate bottom profile that you can hardly see when up, thus giving a highly elegant impression.

# ZIP135

ROBUST SCREEN FOR SHIELDING  
VERY LARGE AREAS

Screen with a robust bottom profile that can be as much as 3 m wide, thus shielding very large windows or areas. We produce it with the top box in a square or half-round variant. The screen mainly features its durability, so it is good for extreme conditions.

## MAX. WIDTH OF 6 METRES

ZIP135 has a robust bottom profile, which makes it more durable and can be made in the max. width of 6 m. Ideal solution for pergolas.

## DURABLE AND QUIET

Thanks to the firm anchoring in the bottom profiles and guiding rails, the screen is resistant to strong winds up to 80 km/h. Further, it is incredibly quiet even in strong wind.

## IT DARKENS AS REQUIRED

We make the textile screen from any of 21 fabrics – from translucent up to strongly darkening blackout creating a perfect dark in the room.

## TIMBER HOUSE IN BOHEMIA

Energy-saving house with 5 rooms and a saddle roof built by GOOPAN company specialising in healthy and energy-saving housing.

Large glass areas in parts with a flat roof are fitted with our ZIP100 screens

which perfectly fit the general house look, supporting temperature control in the interior and providing the required privacy.

# ZIP110

STYLISH SCREEN WITHOUT EXPOSED BOLTS AND WELDS

Elegant screen completely concealed under the façade, free of exposed bolts or welds on the bottom profile. Thanks to the unique tilting system, it is also easy to service, you can replace or repair fabric or motor without a need of bolting.

## CONCEALED MOUNTING

ZIP110 screen is to be mounted under the façade into the prepared box. All anchoring elements are concealed, thus not disturbing the building appearance.

## DURABLE AND QUIET

Thanks to the firm anchoring in the bottom profiles and guiding rails, the screen is resistant to strong winds up to 80 km/h. Further, it is incredibly quiet even in strong wind.

## STYLISH DESIGN

The bottom profile weld and all bolts are concealed, so the screen looks very clean. This can be appreciated mainly on stylish buildings or pergolas.

# ZIP150

ELEGANT SCREEN FOR SHIELDING LARGE AREAS

ZIP150 combines all advantages of ZIP110 and can be made as much as 6 m wide thanks to the robust shaft. The profile width of 150 mm further corresponds to the most popular width of pergolas, so it perfectly matches when assembled and looks absolutely clean.

## FLUSH MOUNTING

ZIP150 screen is to be mounted under the façade into the prepared box. All anchoring elements are concealed, thus not disturbing the building appearance.

## SUITABLE FOR PERGOLAS

ZIP150 is an ideal screen for pergolas. Thanks to its dimensions, durability and 150 mm profile, it perfectly matches on most pergolas and can manage strong wind.

## STYLISH DESIGN

The bottom profile weld and all bolts are concealed, so the screen looks very clean. This can be appreciated mainly on stylish buildings or pergolas.

## CONTEMPORARY PERGOLA WITH SEATING

Contemporary pergola with seating, fitted in the garden area and providing natural transition between the garden and relaxation zone.

The owners chose the ZIP150 screen for pergola shielding that is durable

and is perfect for shielding large areas. The owners matched the fabric colour to the pergola furnishing colour and its delicate profile makes the screen nice and natural.

**IT LOOKS MUCH BETTER  
WHEN YOU SEE IT LIVE**

Call or write to us, make an appointment  
and stop by for a cup of coffee.

We will show you production, introduce  
you our products and discuss how we can  
benefit each other.
