

# IN SHADE WITH US

NEVA®

# WE MAKE EXTERNAL SUN SHADING FOR MORE THAN 40 COUNTRIES OF THE WORLD

We have been a leading Czech manufacturer of external blinds since 1990. Our manufacturing lines make more than 100,000 external blinds and textile screens every year which we supply to tens of thousands of customers all around the world for family and apartment houses, office buildings, winter gardens, pergolas and public buildings.

France, Norway, Israel, Australia, Japan or South Africa – our blinds perfectly manage the Scandinavian climate, scorching heat or extremely salty air in seaside regions.

# THE JOURNEY OF OUR BLINDS AND SCREENS STARTS IN KRALICE NA HANÉ

Only few know the small town on the outskirts of Prostějov with 1,400 inhabitants. But we are making it a Czech Mekka of external blinds.

We built two modern production halls, warehouses, powder coating shop, offices, showroom and relax zones on 14,000 m<sup>2</sup> here. And our plans are far from over.

**2 500**

blinds a week

**350 000**

square metres of blinds a year

# PRODUCTION IS THE BIGGEST PRIDE OF OUR COMPANY

Advanced rolling machinery made by a Czech company ZEBR, high degree of automation and organisation, intelligent purchase order placing system or ever-present proper order and cleanliness. The visitors often say that one could eat from the floor in our

manufacturing facility. It all starts with diligent selection of suppliers. We purchase slat roll for blinds from Switzerland, fabric for roller shutters from France and Belgium, motors from Germany and France. We make small components ourselves.

Automated rolling mills or bending presses with a laser angle check create premium external blinds and screens which we always complete within 10 business days as of placing the purchase order, properly identifying, packing and then safely delivering them to the site or to our assembly partner's warehouse.

# WHEN WE OPENED THE COATING SHOP IN 2014, IT ALSO ATTRACTED OUR COMPETITORS

The times when we outsourced coating of our components from external coating plants are long gone. The outcome was not satisfactory, deliveries were late.

Therefore, we built our own powder coating shop in 2014. It was so unique at that time that our direct competitors enquired coating operations from us.

Thanks to our own coating shop, we have an absolute control over the surface quality and the component completion timing.

# EXTERNAL BLINDS

## MOST EFFECTIVE METHOD OF EXTERNAL SHADING

The material for the external blinds comes from Switzerland, the electronics come from France and Germany. We paint their components in our own powder painting shop so that the paint lasts for years. In addition, we adjust and get the blinds ready already in production so that installing them is as easy as possible. We will manufacture all the blinds on offer within 14 days of a manufacturing order and in addition to the standard 2-year warranty you get a further 2 years.

 Slats in 22 colours,  
accessories in any  
RAL colour

External blinds

- + interesting architectural rendering

External blinds

## F

- + you can tilt them to both sides
- + they save space
- + variable solution

# TEXTILE SCREENS

## STYLISH AND TOUGH EXTERNAL SHADING

Textile screens serve not only as comfortable shading but also as elegant home accessories. In addition, they look good both inside and outside. Besides the various designs of the actual product, you can also choose from three types of fabric that differ in appearance and properties. Whichever variant you choose, you won't wait long for shading. We manufacture all standard textile screens within 10 working days and will add two additional years to your standard 2-year warranty.

 Fabrics in 21 colours,  
accessories in any  
RAL colour

Zipscreen

## ZIP150

- + stylish, quiet and resistant
- + mounting under façade
- + width up to 6 metres
- + width of top box 150 mm

# THE BEST WAY OF CHECKING THE QUALITY OF OUR BLINDS IS TO SEE THEM LIVE

We present our large-format external blinds and screens, catalogues of all slat types and screen fabrics and any minor accessories in our showroom in Kralice na Hané.

In order for the partners to properly see the quality of our products, we have established a training centre that has been designed by Vrtiška & Žák architectural studio.

And if you wish to see our shading equipment live, we can go to see the training centre and showroom from the outside. We have shaded the entire building with our products.

Call or write to us, make an appointment  
and stop by for a cup of coffee.

We will show you production, introduce  
you our products and discuss how we can  
benefit each other.
